

## Code Review Checklist

|            |                      |           |            |
|------------|----------------------|-----------|------------|
| Student    | Bridget Mendez Arano | Date      | 14/02/2025 |
| Program    | Distribucion t       | Program # | 5          |
| Instructor | Dr. Adolfo Centeno   | Language  | Java       |

|                |                                                                                                                                                                                                                                                                                                                                                                  |
|----------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Purpose</b> | To guide you in conducting an effective code review                                                                                                                                                                                                                                                                                                              |
| <b>General</b> | <ul style="list-style-type: none"> <li>- Review the entire program for each checklist category; do not attempt to review for more than one category at a time!</li> <li>- As you complete each review step, check off that item in the box at the right.</li> <li>- Complete the checklist for one program or program unit before reviewing the next.</li> </ul> |

|                     |                                                                                                                                                                                                            |   |  |  |  |
|---------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---|--|--|--|
| Complete            | Verify that the code covers all of the design.                                                                                                                                                             | X |  |  |  |
| Includes            | Verify that the includes are complete.                                                                                                                                                                     | X |  |  |  |
| Initialization      | Check variable and parameter initialization. <ul style="list-style-type: none"> <li>- at program initiation</li> <li>- at start of every loop</li> <li>- at class/function/procedure entry</li> </ul>      | X |  |  |  |
| Calls               | Check function call formats. <ul style="list-style-type: none"> <li>- pointers</li> <li>- parameters</li> <li>- use of '&amp;'</li> </ul>                                                                  | X |  |  |  |
| Names               | Check name spelling and use. <ul style="list-style-type: none"> <li>- Is it consistent?</li> <li>- Is it within the declared scope?</li> <li>- Do all structures and classes use '.' Reference?</li> </ul> | X |  |  |  |
| Strings             | Check that all strings are <ul style="list-style-type: none"> <li>- identified by pointers</li> <li>- terminated by NULL</li> </ul>                                                                        | X |  |  |  |
| Pointers            | Check that all <ul style="list-style-type: none"> <li>- pointers are initialized NULL</li> <li>- pointers are deleted only after new</li> <li>- new pointers are always deleted after use</li> </ul>       | X |  |  |  |
| Output Format       | Check the output format. <ul style="list-style-type: none"> <li>- Line stepping is proper.</li> <li>- Spacing is proper.</li> </ul>                                                                        | X |  |  |  |
| () Pairs            | Ensure that () are proper and matched.                                                                                                                                                                     | X |  |  |  |
| Logic Operators     | <ul style="list-style-type: none"> <li>- Verify the proper use of ==, =,   , and so on.</li> <li>- Check every logic function for ().</li> </ul>                                                           | X |  |  |  |
| Line-by-line check  | Check every line of code for <ul style="list-style-type: none"> <li>- instruction syntax</li> <li>- proper punctuation</li> </ul>                                                                          | X |  |  |  |
| Standards           | Ensure that the code conforms to the coding standards.                                                                                                                                                     | X |  |  |  |
| File Open and Close | Verify that all files are <ul style="list-style-type: none"> <li>- properly declared</li> <li>- opened</li> <li>- closed</li> </ul>                                                                        | X |  |  |  |
